Mesa Safe Company Announces Pharmacy Safes

New Safes Meet an Increasing Demand for Pharmacy Security

Orange, California, April 3, 2015

Mesa Safe Company, a manufacturer of high quality safes for residential and commercial use, today announced its new MRX line of Pharmacy Safes.

With the increased theft of expensive pharmaceuticals and new federal, state, and local regulations regarding the storage, dispensing, and handling of specific types of prescription drugs, pharmacy safes have become a necessity in day to day pharmacy operations.

"Our pharmacy safes don't just deter theft," said Mesa Safe President and CEO George Vicente. "They also keep the drugs out of the wrong hands. It's not just loss prevention; it's social responsibility."

The company offers three different standard models of pharmacy safes, but it also now offers the ability to design a safe to custom specifications. "We realize that not all businesses have the same needs and requirements," said Vicente. "By introducing the capability to produce customized safes, we can ensure that customers have the perfect safe to fit their business needs and budget."

Mesa Pharmacy Safes are available now with Mesa Safe dealers everywhere. For a list of authorized Mesa Safe Dealers, and for more details about these and other safes, please visit www.mesasafe.com. Founded in 1985, Mesa Safe Company is a safe manufacturer based in Orange, California. They offer many different types of safes and accessories for many different applications for home and business.
